ISO 9001 certified company

Environmentally friendly packaging materials for dairy products.

EKO FPO WRAP

New generation of environmentally friendly packaging foil well replacing standard AL/P and AL/P/PE laminates. This film fulfils all mechanical and visual requirements.

EKO FPO WRAP is available in transparent and non-transparent version.

Suitable for packaging of:

- all types of butter and butter mixes
- quark, cottage cheese, ice creams,
- lard and yeast
- minced meat
- sweets

EKO FPO LEAF

EKO FPO LEAF is a second-to-none choice for sealing food cups. The lids can be welded to polypropylene, polystyrene, polyethylene and PVC surfaces.

It is suitable for:

- yoghurt, cream, kefir
- process cheese, cottage cheese
- ice cream and deserts
- salads etc.

EKO FPO LEAF can well replace standard AL and AL/PE lids.

The advantages of using EKO FPO

- extended expiry date for foods
- reduction of package bulk
- best buffering available
- enhanced durability
- high quality of print
- environmentally friendly material
- lower costs

EKO FPO meets the new approach requirements of Directive 94/62/EC on Packaging and packaging waste.

EKO FPO contains mineral substances (51,5 %, including chalk, talc and calcium) and polyolefins (48,5 %).
